Summary

Systems engineer with 6 years of experience building high-performance storage and distributed training infrastructure.

Experience

Senior Software Engineer, Example Compute Inc. — Santa Clara, CA

March 2022 – Present

- Led design of a parallel file system cache that cut GPU training data stalls by 40%.
- Built NCCL-based collective benchmarks across 512 GPUs.

Software Engineer, Sample Storage Systems — Austin, TX

June 2019 – February 2022

- Maintained Lustre and Ceph clusters serving 20 PB for HPC workloads.

Education

University of Example — M.S. Computer Science, 2017 – 2019, GPA 3.8/4.0

Sample State University — B.S. Computer Engineering, 2013 – 2017

Skills

C++, Python, CUDA, NCCL, MPI, Lustre, Ceph, Kubernetes, Linux

Certifications

Certified Kubernetes Administrator — CNCF, 2021

Languages

English, Spanish
